MEMORANDUM

TO City Manager

DATE November 18, 1970

FROM Health Department

SUBJECT Republic Creosote Meeting Concerning Sanitary Sewer Hook-up

On November 16, 1970, Mr. Herb Finch, representing Republic Creosote, met with Mr. Maynard Kays, Superintendent of Water and Sewer; Mr. Jim Jones, Director of Public Works; and Mr. Harvey McPhee and Mrs. Susan Workman, Health Department. The purpose of this meeting was to discuss the future hook-up of the plant with the City's sanitary sewer system. Mr. Finch stated that he was confident that following the installation of their new oil separating system Republic Creosote will meet the effluent standards and release requirements set forth by Mr. Kays in his letter of October 28, 1970. At the present time the plant's primary goal is to get approval for a main connection to the sanitary sewer and as work progresses on the separating system to connect the other buildings on their property to the sewer.

Concerning the odors being emitted from the plant, Mr. Finch stated that on Friday, November 13, 1970, he received a proposal from Pollution Curbs, Inc. which evidently suggested incineration of the odoriferous gases. However, Mr. Bill Justin had taken the report to a conference in Mississippi and Mr. Finch was unable to give us any details.
